

José Gregorio Materán

, Computer Engineer and Web Developer

I am a programmer passionate about electronic products, with over 7 years of experience in web application development. I focus on the React and TypeScript ecosystem, and I also have skills in mobile and desktop development.

Work experience

August, 2017

November, 2024

Frontend web developer at zkreations

My main work is the creation of tools made in JavaScript that streamline the process of creating software and eliminate repetitive tasks. I have also developed two component libraries (of which I am the main maintainer) that have meant an increase in productivity.

April, 2015

August, 2017

Freelancer

During this time my main work was developing websites for brands and individuals. I also created from scratch custom functionalities for existing projects. In addition to creating applications from scratch and maintaining several of them.
